

IPO11/AHRR FISH Probe Kit

Introduction

The IPO11/AHRR FISH Probe Kit is designed to detect the human *IPO11* gene located on chromosomes band 5q12.1, along with the *AHRR* gene region on chromosome band 5p15.33 as a control for integrity of the 5p subtelomeric region. Rearrangements and abnormal expression of the *IPO11* gene – also known as *RanBP11* – have been observed in bladder cancer and other tumor types.

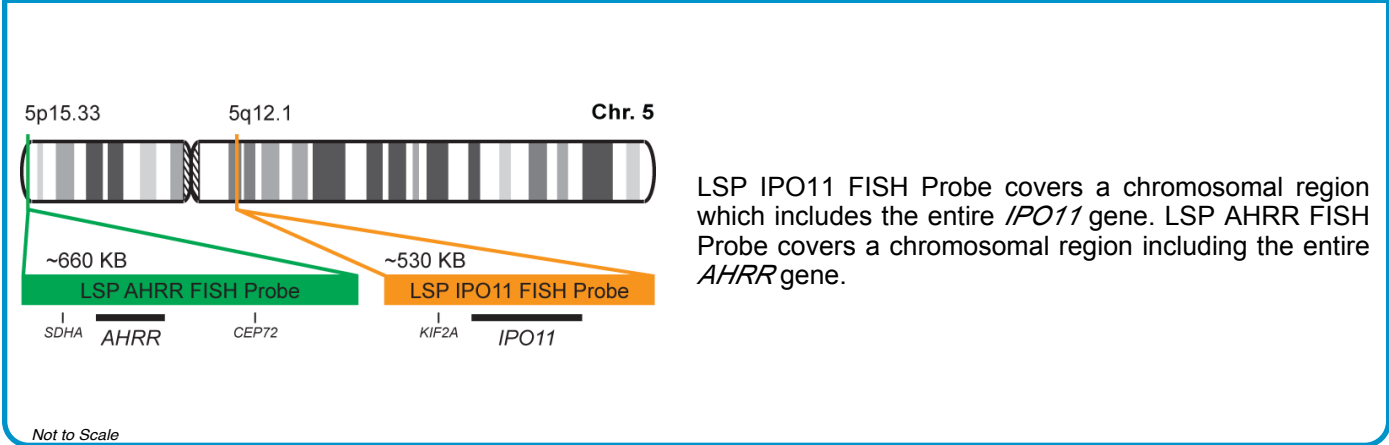

Intended Use

To measure the copy number of the human *IPO11* and *AHRR* gene located on chromosome band 5q12.1 and 5p15.33, respectively.
