

TP73/CCP1 FISH Probe Kit

Introduction

The TP73/CCP1 FISH Probe Kit is designed to detect the human *TP73* gene located on chromosome band 1p36.32, along with the number of chromosome 1 copies per cell. Abnormal expression of the *TP73* gene – also known as *P73* – has been observed in various cancer types.

Intended Use

To measure the copy number of the human *TP73* gene located on chromosome band 1p36.32.

Probe Design

Not to Scale

LSP TP73 FISH Probe covers a chromosomal region which includes the entire *TP73* gene. CCP1 FISH Probe, derived from chromosome 1-specific alpha satellite DNA, is designed to serve as a control to determine the number of chromosome 1 copies per cell.
