

## MYCN/CCP2 FISH Probe Kit

### Introduction

The MYCN/CCP2 FISH Probe Kit is designed to detect the human *MYCN* gene located on chromosome band 2p24.3, along with the number of chromosome 2 copies per cell. Amplification and abnormal expression of the *MYCN* gene – also known as *NMYC*, *OEDD*, *MODED*, *N-myc*, *bHLHe37* – have been observed in neuroblastoma, medulloblastoma, rhabdomyosarcoma and various other tumor types.

### Intended Use

To measure the copy number of the human *MYCN* gene located on chromosome band 2p24.3

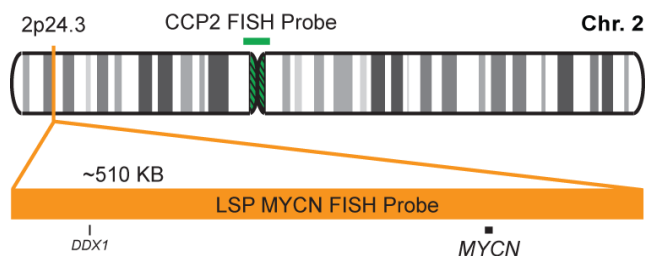

### Cont.

LSP MYCN FISH Probe  
CCP2 FISH Probe

### Color

CytoOrange  
CytoGreen

### Probe Design

LSP MYCN FISH Probe covers a chromosomal region which includes the entire *MYCN* gene. CCP2 FISH Probe, derived from chromosome 2-specific alpha satellite DNA, is designed to serve as a control to determine the number of chromosome 2 copies per cell.

Not to Scale

### Cat. No.

CT-PAC072-10-OG

### Volume

10 Tests (100 µL)

### Signal Pattern Interpretation

#### Normal Pattern

2O + 2G

#### Abnormal Pattern
