MONOCLONAL ANTIBODY TO
MOUSE JUNCTIONAL ADHESION MOLECULE-C (JAM-C)
clon CRAM-19 H36

Catalog nr  HM1056 (lot number and expiry date are indicated on the label)

Description  Junctional adhesion molecule-C (JAM-C) also known as JAM-2 is a 45 kD cell adhesion molecule (CAM). JAM-C is a transmembrane protein which is a member of the immunoglobulin superfamily found at intercellular junctions of endothelial cells. JAM-C belongs together with JAM-A (JAM or JAM-1) and JAM-B (VE-JAM or JAM-3) to a family of adhesion proteins with a V-C2 immunoglobulin domain organization. JAM plays an important role in tight junctions where it is involved in cell-to-cell adhesion through homophilic interaction. It codistributes with other tight junction components as ZO-1, 7H6 antigen, cingulin and occludin. JAM-C is potentially involved in the junctional sealing of the vascular endothelium, in particular of high endothelial venules (HEV). In adult murine tissue JAM-C expression is reported to be restricted to high endothelial venules of lymphoid organs, lymphoendothelial cells and endothelial cells in kidney. Monoclonal antibody CRAM-19 H36 also reacts with human JAM-C. In humans, JAM-C expression is not restricted to endothelial cells, but is also expressed on human lymphocytes.

Species  Rat IgG2a

Formulation  1 ml (100 µg/ml) 0.2 µm filtered antibody solution in PBS, containing 0.1% bovine serum albumin and 0.02% sodium azide.

Application  Monoclonal antibody CRAM-19 H36 can be used for immunoprecipitation, immunoassays as detector antibody, immunohistochemistry on frozen sections and flow cytometry. Antibody CRAM-19 H36 can not be used for Western blot and immunohistochemistry on paraffin sections.

Use  For immunohistochemistry and flow cytometry dilutions to be used depend on detection system applied. It is recommended that users test the reagent and determine their own optimal dilutions. The typical starting working dilution is 1:50.

Storage and stability  Product should be stored at 4°C. Under recommended storage conditions, product is stable for one year.

Precautions  For research use only. Not for use in or on humans or animals or for diagnostics. It is the responsibility of the user to comply with all local/state and federal rules in the use of this product. Hycult Biotech is not responsible for any patent infringements that might result from the use or derivation of this product.

Also available  HM1056F FITC conjugated monoclonal antibody against Mouse JAM-C, clone CRAM-19 H36
HM1057 Monoclonal antibody against Mouse JAM-C (JAM-2), clone CRAM-18 F26
HM1050 Monoclonal antibody against Mouse JAM-A (JAM-1), clone BV12
HM1052 Monoclonal antibody against Mouse Nectin-2, clone 502-57
HM1053 Monoclonal antibody against Mouse Nectin-3, clone 103-A1
