

RNA Save

Sample storage solution for RNA stabilization
Cat. No. 01- 891-1

Description

RNA Save is a solution that simplifies the collection of RNA samples from operating rooms and other field locations; it protects and stabilizes the RNA in tissue and cells without need for freezing, thus enabling easy transportation and storage.

Features

- Easy to use - collect sample (do not freeze), store in RNA Save at 4°C over night and then freeze
- Scalable
- One solution
- Working with variant samples - cells and tissue
- Working with variant origin - animal, plant and bacteria.

Storage Conditions of Samples: Keep the samples in RNA Save solution and store them at -20°C or -80°C indefinitely
