

## Enzyme Linked ImmunoSorbent Assay

**PathoScreen<sup>®</sup> ELISA Kit.** are complete ELISA kits for plant pathogen detection that contain all the materials necessary to perform the ELISA test. Most importantly, PathoScreen kits include precoated microtiter ELISA plates which save time and offer extraordinary stability. Kits are available in three sizes, 96, 288, and 480 testwells. Contents:

- Sample extraction buffer
- Antibody-coated<sup>1</sup>, 96 testwell, break-apart microtiter plates
- Conjugated antibody<sup>2</sup> and diluent
- Wash buffer
- Substrate materials:
  - TMB substrate solution, for Peroxidase kits
  - PNP tablets and substrate buffer, for Alkaline phosphatase kits
- Positive control<sup>3</sup> if available
- Negative control<sup>3</sup> sold separately if available

**\* Note: Indirect ELISA PathoScreen kits include uncoated plates and the primary antibody.**

**Reagent Set.** Coating (IgG) and conjugate antibodies for plant pathogens and other antigen detection. Reagent sets are available in four sizes, 96, 500, 1000 or 5000 testwells. Contents:

- Uncoated, 96 testwell, solid plates
- Coating or primary antibody<sup>1</sup>
- Conjugated antibody<sup>2</sup>
- Positive and Negative Controls sold separately<sup>3</sup>

Note: Peroxidase reagent sets also include TMB substrate materials.
