For powerful RNA isolation from multiple soil types.

Product Features and Benefits

- **More Sample Types** - Processes more soil types including difficult environmental samples.
- **More RT-PCR Results** - RT-PCR inhibition was not observed in any of the samples tested.
- **More Time Savings** - Purifies RNA from up to 2 grams of soil in less than 2.5 hours.
- **More Purity** - Gives high quality RNA free of RT-PCR inhibitors including humic substances.
- **More Clarity** - No visible brown coloration was seen in any of the samples tested.
- **Potential Applications** - Biodefense, soil-borne pathogen research, agriculture, zoology.

RNA PowerSoil™ Total RNA Isolation Kit - More Effective for Community Analysis using RT-PCR
